Objective

Entry-level software developer with a strong passion for coding and a solid foundation in programming languages such as C Core java and SQL.Eager to apply technical skills and knowledge to drive innovation and growth in a dynamic software development team.

Experience

- Fresher

Education

- Cauvery Institute Of Technology, Mandya-Bachelor of Engineering** 2026
Computer Science And Engineering (pursuing)

Skills

- Basic Knowledge in C, python And JAVA
- Web Technologies: HTML and CSS
- Tool : Jupyter, VS code , Notebook
- Communication and TeamWork

Projects

- Skin Cancer Detection Using CNNAnd YOLOv8 Algorithms**
The development of a machine learning-based skin cancer prediction system represents a significant advancement in the early detection and diagnosis of skin cancer, a condition that, if caught early, can be treated effectively, saving countless lives.
- Hide Secret Text Message Using Steganography Tutorial**
Data privacy and security are more important than ever in today's digital world. Our project aims to explore the fascinating field of steganography, where we'll use the powerful capabilities of Python and the user-friendly interface provided by Tkinter to create an application that allows users to hide secret messages within images.

Achievements & Awards

- Awarded as a best Student coordinator in our Campus.

Languages

- English
- Kannada

Certification

- Career Orientation workshop in ABC Technology Training and Upskilling.
- Data science with AI and Machine Learning workshop in Cranes Varsity.
