Objective

Entry-level software developer with a strong passion for coding and a solid foundation in programming languages such as javascript, HTML and CSS .Eager to apply technical skills and knowledge to drive innovation and growth in a dynamic software development team.

Experience

- Fresher

Education

- **Cauvery Institute Of Technology, Mandya-Bachelor of Engineering** 2026
Computer Science And Engineering (pursuing)
8.0

Skills

- Web Technologies: HTML , CSS , Node.js , Javascript, Mongodb, Express.js and React
- Tools : GitHub , VS Code and Netfiy
- Good Knowledge in C , Java and Python
- Communication and Teamwork

Projects

- **LinkedIn Clone**
Developed a CLI-based LinkedIn inspired application using Node.js and Express.js that simulates core networking platform features such as user profiles, post management, authentication flow, and structured backend routing
- **Book My Show**
Full stack movie ticket booking app with AI-based recommendations.
Using the tools :
ReactJS, ExpressJS, MongoDB
- **Skin Cancer Detection Using CNNAnd YOLOv8 Algorithms**
The machine learning-based skin cancer prediction system helps in the early detection and diagnosis of skin cancer, improving treatment chances and saving lives
- **Hide Secret Text Message Using Steganoraphy Tutorial**
This project uses Python and Tkinter to create a simple application that hides secret messages inside images using steganography. It helps protect data privacy and security by securely embedding confidential information within image files.

Languages

- English
- Kannada

Internship

- Agasthya Edtech private limited (ABC training technology and upskilling)
Developed responsive web application features using HTML, CSS and JavaScript.
Implemented form validation and improved user interface components.

Certification

- Career Orientation workshop in ABC Technology Training and Upskilling.
- Data science with AI and Machine Learning workshop in Cranes Varsity.
